

## Reviewer acknowledgment

At the conclusion of Volume 16 of the Asian Nursing Research, the Editors wish to express gratitude and appreciation for the support of so many colleagues who have dedicated their time for ANR this year. They evaluated the research that was submitted to the journal and shared their insights about the papers' strengths and weaknesses. This enabled us to make the right decisions and it helped our authors to further improve their work. At the end of this year, we would like to take an opportunity to openly acknowledge all those reviewers who have contributed to the journal's success. Their names of those who completed one or more reviews between January 1st, 2022 and November 30th, 2022 are listed as below. We would like to warmly thank them for their hard work and dedication and would like to extend a special thanks to those who completed their reviews on time as good and timely peer review is absolutely essential for the success of the ANR.
